

ZERO-FLEX™

Hair Care System

Creates a Safe and Comfortable Salon Experience

- Unlike neck pads and portable shampoo basins, the Zero-Flex System eliminates all neck hyper extension. This is especially helpful for those clients with musculoskeletal issues, at risk of stroke, or who just prefer more comfort during washes and processes.
- Easily accommodates any chair, shampoo bowl, backwash system, or wheelchair.
- Basin completely encompasses the client's head, allowing the stylist or caregiver to wash and rinse hair without splashing or dripping.
- Upright position eliminates the need to bend over while washing and rinsing hair, reducing back strain for stylists and caregivers.
- Designed by a physician.

Over 60 years of commitment to the professional salon industry.
