Access Goes Anywhere

The PAL-Portable Aquatic Lift was introduced in 1996 and changed both the technology and the look of aquatic lifting systems. The PAL was both the first fully portable aquatic lift, and the first aquatic lift to use a rechargeable battery as a power source. The PAL was also the first lift to effectively address different types of gutter configurations, essentially providing accessibility to any type of swimming facility.

The PAL-Portable Aquatic Lift is the company's flagship product and is available in three configurations to accommodate virtually any type of aquatic installation.

PAL Features

- Completely portable-no deck fixtures
- Powered by a rechargeable battery
- Reliable electronic operation
- User operable
- Waterproof hand control
- Advanced seating system
- Fabricated from non-corrosive metals
- Tough powder-coated finish
- 300 lb. lifting capacity
- Lifetime warranty on frame

All pool lift products manufactured by RehaMed
International meet or exceed Americans with Disabilities
Act Accessibility Guidelines (ADA/ABA 2004).

PAL Spa Version

The Spa Version is designed to work with bodies of water located above deck level. This could be either a raised pool or an above ground spa.

The Spa Version can be used for pools that are up to 48 inches above the deck. Aside from the height differential, the Spa Version provides all the features of the Standard PAL lift.

PAL Hi/Lo

The PAL Hi/Lo is designed for facilities that have both above ground pools and in ground pools and want to use one lift for both pools.

The PAL Hi/Lo features an easily adjustable seat with both a high and low setting. The high setting is selected when the lift is used with an above ground pool, and the low setting is used for ground level pools.

The PAL Hi/Lo cannot directly transfer a swimmer from an above ground pool to a ground level pool, as the seat settings need to be changed.

Battery & Charger

General Specifications

- Height 66"
- Base Height 22.5"
- Base Length 37.5"
- Base Width 28"
- Total Weight 845 lb.
- Maximum Length
 - With footrest 106"
 - W/o footrest 91"
- Storage Position Length 61"
- Power 24v DC
- Battery Life 30 cycles (approx.)
- Lifting Capacity 300 lb.

Accessories

- Arm Rests
- Spineboard Attachment
- Stability Vest
- Total Cover
- Seat Pad
- Wireless Controller
