The Kinesio Taping® Method

The Kinesio Taping® Method has taken the Rehabilitation and Sports Medicine world by storm. Developed by Dr. Kenzo Kase over 30 years ago, Kinesio Taping has become the gold standard for therapeutic rehabilitative taping. Our proprietary method of taping uses a uniquely designed and patented tape for treatment of muscular disorders and lymphedema reduction.

Since the introduction of Kinesio Taping into the US, medical professionals have recognized and embraced this effective, safe, and easy-to-use modality. The method and tape allow the individual to receive the therapeutic benefits 24 hours a day because it can be worn for several days per application. With over 5,000 Certified Kinesio Taping Practitioners® in the United States alone, Kinesio Taping is used in hospitals, clinics, universities, high schools, and by professional sports teams.

The Kinesio Taping Method involves taping over and around muscles in order to assist and give support or to prevent over contraction. The first technique gives the practitioner the opportunity to actually give support while maintaining full range of motion, enabling the individual to participate in physical activity with functional assistance. The second technique helps prevent overuse or over-contraction and helps provide facilitation of lymph flow 24 hours a day. It is most commonly used in the acute stage of rehabilitation. Correctional techniques include mechanical, lymphatic, ligament / tendon, fascia, space, and functional. Kinesio Tex Tape can be used in conjunction with other therapies, including cryotherapy, hydrotherapy, massage therapy, and electrical stimulation.

The Kinesio® Benefits

All modalities have a system of assessment associated with them to help determine parameters for treatment. The Kinesio Taping Method offers 8 Assessments to guide the clinician in effective Kinesio Tex Tape Applications. In addition to each Health Professional's skill set, the Certified Kinesio Taping Practitioner has the added benefit of learning to test for tissue restrictions like Dr. Kase does. The following Screening Tools may be used:

KINESIO TAPING SCREENING ASSESSMENTS to examine skin, fascial, muscle and joint mobility

MANUAL MUSCLE ASSESSMENT to identify muscle strength

RANGE OF MOTION to determine limitations in flexibility

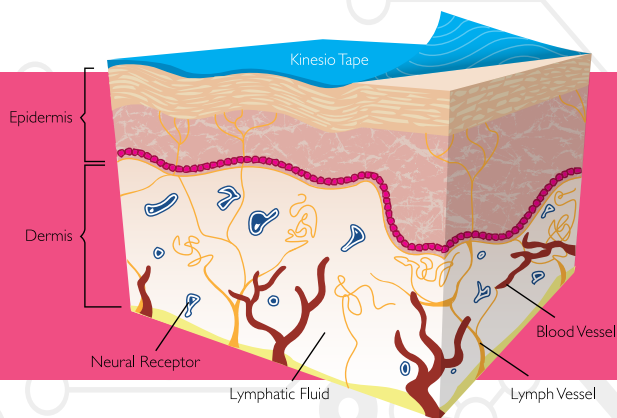

ORTHOPEDIC ASSESSMENT to identify structural anomalies and dysfunction

During the Kinesio Taping Association's certification course, you will learn how to properly perform Kinesio Taping Assessments in order to treat your patients with the Kinesio Taping Method. With an understanding of the Kinesio Taping Method guidelines, one is able to develop a successful treatment program for the individual goals of each patient.

THE *Original* KINESIO® TAPE

How Kinesio Works

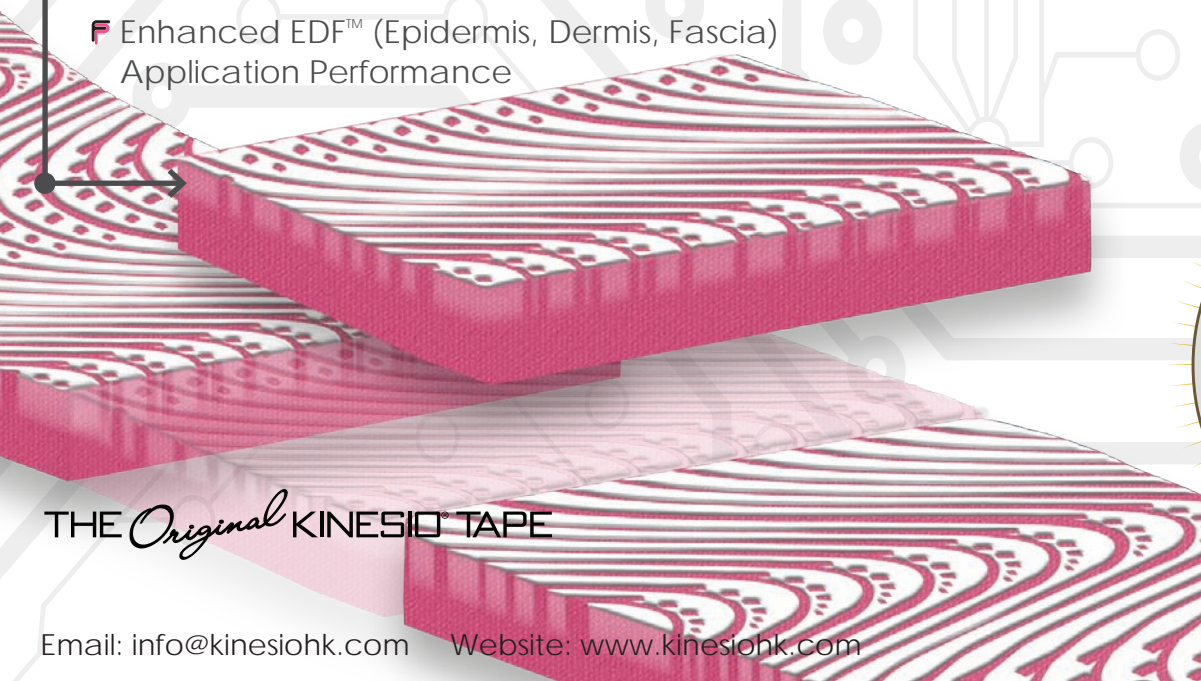

Kinesio Taping alleviates pain and facilitates lymphatic drainage by microscopically lifting the skin. The taped portion forms convolutions in the skin, thus increasing interstitial space. The result is that pressure and irritation are taken off the neural and sensory receptors, alleviating pain. Pressure is gradually taken off the lymphatic system, allowing it to drain more freely.

KINESIO® TEX GOLD FP™

Developed exclusively for Kinesio Professionals, Dr. Kenzo Kase and Kinesio bring to you the latest R^eEvolution in Kinesio® Tex tape with over 30 years of research and development. Advancements in technology have now enabled a R^eEvolution that fulfills the original vision. From our original and now world famous wave pattern design Kinesio has developed a **NEW** enhanced and Patented FingerPrint technology.

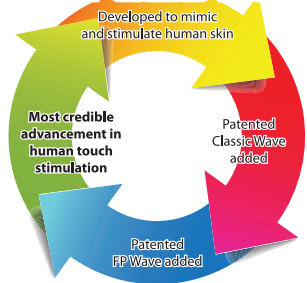

- ✚ Brings Nano-touch stimulation to epidermis and layers beneath
- ✚ Mimics gentle human touch yet provides a more effective hold
- ✚ Micro-grip deep set adhesive manufacturing process provides better grip and hold with less adhesive surface area
- ✚ Higher grade cotton with more breathability
- ✚ Features a new protected weave process for improved comfort
- ✚ Core properties remain for all Kinesio Taping® specifications
- ✚ Hypoallergenic and latex free for all patient populations
- ✚ Exclusively available to Medical Care Professionals only
- ✚ Enhanced EDF™ (Epidermis, Dermis, Fascia) Application Performance

Kinesio® Pro Scissors:

Kinesio Pro Scissors are specifically designed to be used in conjunction with Kinesio Tex Tape.

Use Kinesio Pro Scissors to cut any length or configuration of Kinesio Tex Tape with ease. Every pair of Kinesio Pro Scissors is forged of high quality carbon stainless steel and double-coated for clean cutting. Kinesio Pro Scissors are designed specifically for use with tapes and adhesives. Carefully crafted using the best available technology, Kinesio Pro Scissors ensure that your first cut is as smooth as your last.

Kinesio Pro Scissors also come with a Kinesio Pro Scissor holster allowing you to protect your new Kinesio Pro Scissors while keeping them right by your side. The Kinesio Pro Scissor Holster can either be clipped to your waistband or looped through your belt for extra security. The Kinesio Pro Scissor Holster is constructed of durable synthetic leather and is double-stitched in areas for added strength.
