

The **Dale Post-Surgical Bra** offers the soft support patients need following mastectomy, lumpectomy, radiation therapies, and other oncology procedures.

Dale
Always Better

Post-Surgical Bra

THE SUPPORT AND COMPRESSION PATIENTS NEED IMMEDIATELY FOLLOWING BREAST SURGERY OR DURING THE RADIATION PROCESS.

The soft, breathable fabric stretches to accommodate edema without binding or irritating sensitive tissue. A front hook and loop closure facilitates inspection of the surgical site and dressing changes. The Dale Post-Surgical Bra can be worn alone or can be used to hold surgical dressings in place without tape. It is available in five sizes to accommodate virtually all patients without requiring extensive inventory.

- Secure, long-term comfort
- Stretch knit fabric lets treatment site breathe
- Material expands and contracts to accommodate edema
- Seamless design helps prevent trauma
- Hook and loop closure permits easy application and inspection
- Detachable straps allow for multiple application options
- Provides maximum comfort throughout recovery
- Not made with natural rubber latex.

FOR USE AFTER A WIDE RANGE OF PROCEDURES

- Oncology
- Mastectomy
- Lumpectomy
- Reconstruction
- Radiation
- MammoSite®
- Biopsy
- Fine needle aspiration
- Reduction
- Breast Lift
