# Antimicrobial Dressings with PHMB

Consider Cardinal Health™ AMD antimicrobial dressings — with the power of proven, affordable PHMB (polyhexamethylene biguanide) — when your patients need it most. It's protection that works as hard as you do to prevent infection. From Cardinal Health, the pioneer in skin protection.

# Hard on bacteria. Easy on skin.

The Cardinal Health™ line of antimicrobial dressings (AMD) is impregnated with 0.2% PHMB (polyhexamethylene biguanide), a bacteria-killing polymer. So you get powerful antimicrobial action that stays gentle on skin.

- PHMB kills a broad-spectrum of bacteria
- Provides protection against 15 gram-negative, gram-positive and fungi/yeast microorganisms
- Resists bacterial colonization and reduces bacterial penetration within the dressing
- Proven to perform without negatively impacting epithelization
- Low to minimal cytotoxicity
- No known resistances

**More power to protect. More power to prevent. More power to heal.**

## Learn how PHMB works.

PHMB attacks bacteria on and within the dressing to help you keep bacteria out of the wound, limit cross-contamination and promote a healing environment.

### Effective against a broad spectrum of bacteria:

*Methicillin-resistant Staphylococcus aureus (MRSA)*

*Vancomycin-resistant Enterococcus (VRE)*

*Acinetobacter baumannii*

*Staphylococcus epidermidis*

*Pseudomonas aeruginosa*

*Escherichia coli*

*Candida albicans*

*Coagulase-negative Staphylococcus*

*Proteus mirabilis*

*Serratia marcescens*

*Enterobacter cloacae*

*Klebsiella pneumoniae*

*Enterococcus faecalis*

*Propionibacterium acnes*

#### Give more patients the prevention they need:

- diabetic patients
- surgical patients
- elderly patients
- CABG and orthopedic surgeries
- caesarean sections
- heel or foot ulcers

## Alginates

### Calcium Alginate Dressings – Kendall™

- Absorbs exudate from wound and creates a protective cushioning gel and optimal moist healing environment
- Protective gel binds exudate and helps prevent skin maceration
- Can be used on infected wounds
- Absorbs approximately 20 times the dressing's weight
- Unique composition and weaving pattern help provide a simplified one piece removal
- Not made with natural rubber latex

### Reinforced Gelling Fibers (Alginate) – Cardinal Health™

- Non-woven calcium/sodium alginate consisting of a high M alginate in a cohesive fiber construction
- Our reinforced gelling fibers assist in maintaining a moist environment for optimal wound healing and the formation of granulation tissues
- Highly absorbent gelling fibers wick and retain exudate away from the wound bed
- Cohesive fiber construction facilitates easy intact/one piece atraumatic removal
- The silver ions in our reinforced gelling Fibers+Ag protect the dressing from a broad spectrum of microorganisms over a period of up to 14 days
- Not made with natural rubber latex
